AMASPACE BUILDING SERVICE COMPANY

Excellence & Smart Work for Maximum Productivity

Amaspace is a fast-growing building service firms in Nigeria with a strong reputation, backed by a robust proven track record of employing cutting edge technology with the highest quality standards, seasoned technical expertise, and exceptional safety specifications in applying innovative approach to electrical, mechanical, plumbing, fire safety and security solutions for buildings, infrastructure and project management.

About Us

As one of Nigeria's fast growing building service company and management consultants we are very passionate, and driven towards customer satisfaction by employing best industrial practices and standards compliance. We are intensely focused on adding significant and incomparable value to our clients' by ensuring reliable and effective delivery of projects using a broad range of multidisciplinary contracted services to ensure seamless operation, execution and management of all projects awarded.

We set the benchmark in engineering, management and consultancy in Nigeria by adopting state of the art technology coupled with the best technical experts' team in the country to provide our clients with the highest quality of service strictly planned and executed to align with the clients' specific needs and requirements on time and within budget which achieves its desired objectives and benefit communities and recipient of the project.

We believe all projects are unique and therefore needs detailed, tailored, specific, innovative and optimal solution and strategy by the best professional expert available to deliver the highest standard and best quality with utmost efficiency and satisfaction. This approach to project delivery is what has kept us at the upper echelon in the industry in the Nation instead and across the Globe

Our values form the foundation of our commitment to our craft, our client and our contribution to the communities we impact.

Our Commitment to Excellence is Unmatched: It is the forefront of Amaspace policy to develop and deliver products and services with the highest quality which consistently conform to customer requirements, and to pursue the goal of 100% error-free performance through the highest standard of quality product, process and management development. This policy is founded on two key principles; the first drives our internal management process, and the second defines how we relate to the external partners and stakeholders involved in the strategic alliance of the project.

Internal Quality and Excellence Is Priority: We are obsessed with setting high standards for performance in our procedures, services, and relationships with management, our staff and subcontractors. This means that we create and strictly monitor processes and procedures that will best support the achievement of those standards and measure performance according to those standards while also running stringent quality control programs.

External Partnering Towards Shared Success: We strive to build relationships with our business partners based on trust, collaboration and good will, and we seek common goals with our fellow project participants. Our partnering approach relies on a structured system to develop a spirit of teamwork and cooperation through: shared goals; open communication and problem identification; established conflict resolution procedures; and, monitoring of the team performance.

Our Commitment to Safety is Unrivalled: As a leader in the industry, the promotion of accident prevention and a safe working environment is a top priority. In every jurisdiction in which we operate we take the time to review the safety regulations, and seek to go beyond the legal requirements to ensure the safety of our employees, the traveling public and all those who may have occasion to enter our worksites.

Our company safety policy commits us to provide active leadership and complete support in order to prevent human pain and suffering from personal injury and economic losses from property damage. We also provide high level of specialized safety training to our employees, at all levels. This is provided externally through professional safety training associations, as well as internally by our own experienced and trained personnel.

We recognize that it takes everyone working together to make a safe and healthy workplace and a safety program is only as good as its results. That's why we go to extra length to measure the results of each initiative and also audit on a regular basis by accredited external safety auditors which provides us with the information needed to adjust and continuously improve our programs.

Our quality management system is ISO 9001 compliant.

Our Mission, Vision and Strategy

Mission

Our mission is to offer our clients high quality and value- added consultancy and project execution in an innovative, cost efficient and sustainable manner and constantly increase the benchmark for quality service delivery for electrical, mechanical, construction, fire safety and plumbing solutions projects across Africa.

Vision

Amaspace is a building service company that seeks to offer the very highest level of quality, because we believe that a commitment to excellence is key to developing sustainable solutions for today's challenges. We aim to be the leader and ultimate point of reference and lead innovation in the industry in Nigeria and across Africa thereby creating exceptional value for our stakeholders.

Clients

Our client base cuts across various discipline, we help resolve challenges faced in both the public, private and social-sector clients by efficient and effective execution and management of projects and providing advice to contractors, engineering and architectural firms, energy and water companies, and industry.

In the public sector, we work for national and state governments and our activities cover the entire chain, from policy-making and design, to contracting and supervising the performance of work. We establish long-term relationships with our clients that enable us to meet their needs and expectations as effectively as possible while delivering maximum added value.

Strategic Pillars

- Knowledge and innovation: As a Leading expertise, it is essential to devise sustainable solutions to complex challenges in the field of water, infrastructure, the environment and construction. To achieve this, we engage the best minds in every field we work in. Amaspace maintains excellent contacts with educational and knowledge institutions. We organize various meetings and symposia to encourage the development of new knowledge and to promote innovation.

- Collaboration
  The issues we tackle are becoming increasingly complex. To devise sustainable solutions to these challenges, our staff work as multidisciplinary project teams alongside colleagues from various backgrounds. Good cooperation is essential, both within the company and with external partners. In many cases, cooperation

can be formalized in strategic alliances or joint ventures with other leading consultancies and complementary organizations.

- Talent development and growth
  By making the best possible use of everyone's talents, we can maximize our contribution to solving global challenges. Amaspace wishes to help all employees (and potential employees) achieve their full potential and realize their dreams and ambitions. Our human resources strategy is geared towards allowing all staff to gain experience in challenging projects and to take advantage of various training opportunities. New staff take part in an introduction program, while the majority of management positions are filled by means of internal promotion.

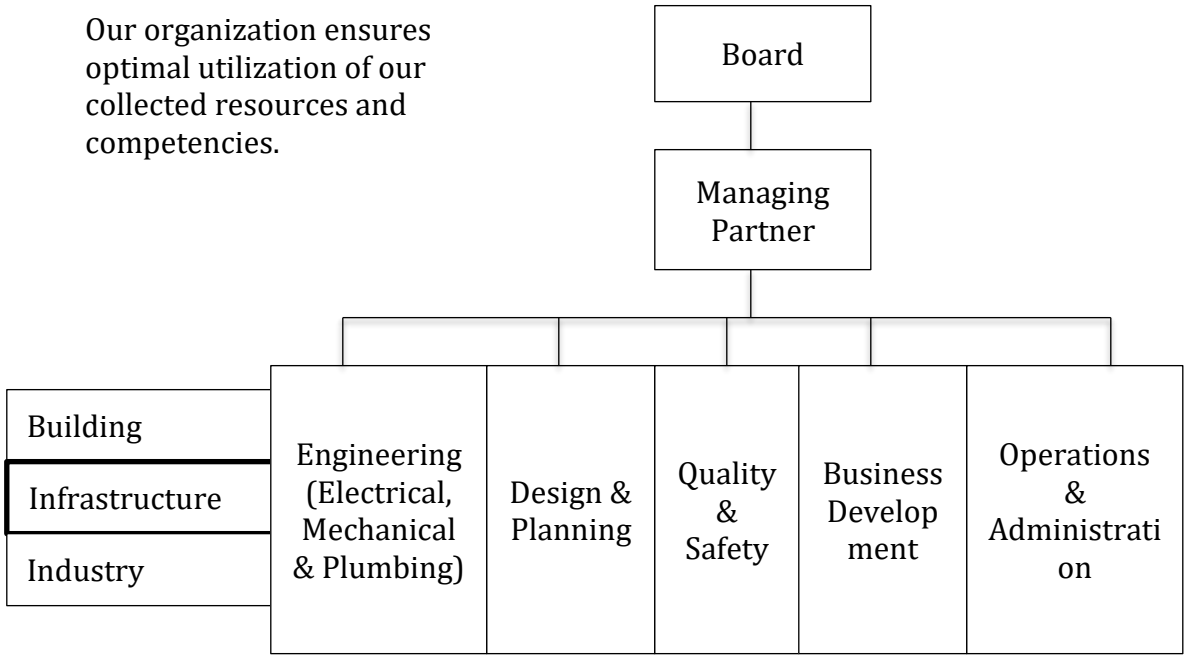
Key Performance Indicators

Amaspace uses Key Performance Indicators (KPIs) to measure operational processes and make adjustments, if necessary, in order to safeguard the long- term continuity of the company. Our KPIs are aligned with our mission and vision, and address matters of importance to Amaspace (impact) as well as our stakeholders in the chain (materiality). In addition to financial KPIs, we have also defined two non-financial KPIs: delivering social value and developing top talent.

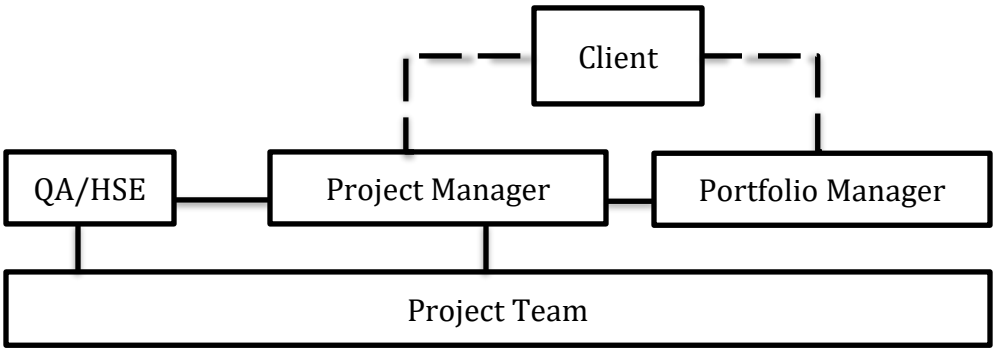
Organization

Company Wide Organization

Our organization ensures optimal utilization of our collected resources and competencies.



Project Organization



Amaspace has a clear and manageable project organization that ensures a short chain of command and rapid decision making. Individual projects are managed by the project manager who leads a project team specifically designed for the assignment. The project manager has overall responsibility in relation to the client and is supervised by a portfolio Manager.

Industries where we work

Construction

We offer our clients, direct access to an experienced team of specialists offering consultancy services in preliminary work, building design, construction management as well as construction supervision and maintenance work. With years of experience on a variety of complex, large-scale projects, Amaspace is equipped to support all forms of construction delivery, including procurement, installation, troubleshooting and maintenance of EPCM, Alliances, PPP, Early Contractor Involvement.

We assist contractors to win projects and grow their businesses by providing the best and brightest people to develop innovative and efficient designs.

Energy

We draw on the talents of our global collaborators to provide clients with access to expertise in all areas of the energy industry, including power generation, industrial and process engineering, together with energy advisory and management consulting services. We also undertake financial modeling to support policy and investment in the industry.

Our specialist oil and gas team deliver high-end engineering solutions to our clients' industry specific challenges. Amaspace provides comprehensive consultancy services over the entire life cycle of power generation, transmission and distribution projects, from feasibility studies through to asset management. We offer innovative services for renewable energies, and are leaders in the wind technology industry.

Data & Telecommunications

Increasing social and political pressures are being placed on governments and network operators to provide infrastructure that can deliver large quantities of data and telecommunications more quickly and economically.

Amaspace works with key public and private clients to deliver major data and telecommunications infrastructure projects together with business solutions to meet this challenge.

Our technical experts provide smart building services solutions for data centers by utilizing

our strong industry connections and access to resources across geographies.

Amaspace's 'whole of project' approach provides our clients with an integrated service to deliver network deployment, infrastructure and buildings for data and telecommunications services.

Government

Amaspace supports local, regional and national governments in providing a comprehensive range of services, including optimizing the available resources towards sound infrastructure investment decisions, positioning assets to meet long-term service delivery priorities and accommodating long-term growth.

We have extensive experience in the provision of planning and advisory services for health, aged care and education facilities.

Our technical competencies span the entire infrastructure life cycle — from planning, design and construction to operations and maintenance of services including energy, housing, roads, water and wastewater.

International Development Assistance

At Amaspace we believe that sustainable solutions are a positive step towards alleviating poverty. These solutions enable developing countries to create and develop their capacity to overcome this challenge.

We are open to partnerships with major donors like the World Bank, European Union, African Development Bank, Asian Development Bank and USAID, as well as bilateral agencies, to offer services such as the provision of roads or clean water, as well as social projects in health and education.

As an emerging leader in the industry, Amaspace has the extensive knowledge, experience and expertise to provide innovative and effective implementation of projects. Clients can trust us to effect real change in the countries and communities where we work.

Manufacturing

Amaspace has the expertise and global resources to provide clients with a broad spectrum of safe, environmentally sustainable and cost-effective solutions that span the entire life

cycle of manufacturing projects. This extends from concept development and evaluation of an opportunity, through to the creation of new assets, and their sustainment and improvement.

We understand the need for bottom line focused engineering solutions that, in addition to enabling cost efficiencies, will ensure long-term durability and ease of execution.

We offer specialist solutions relating to:

- Asset management
- Commissioning and start-up
- Environmental management planning
- EPCM
- Planning and approvals
- Process design and analysis
- Societal license to operate
- Supply chain logistics
- Water and waste treatment

Natural Resources

Long term global demand for commodities, driven by emerging economies, will continue to apply pressure on the resources industry to mine, process and export these commodities, at a competitive cost.
We are focused on assisting our clients through tailoring solutions that increase direct operating hours — improving reliability and reducing maintenance through operational design solutions.

Amaspace can deliver small start-up facilities through to major engineering, procurement and construction management (EPCM) projects, including bulk materials handling projects, mine, rail, seaboard import and export terminals, and associated port and marine facilities.

Utilizing our global access to multidisciplinary skills, Amaspace delivers a range of engineering services across the entire project life cycle, including:

- Engineering, procurement and construction management
- Scoping, conceptual, pre-feasibility and feasibility studies
- Health, safety and environmental management
- Owner’s Engineer
- Process automation, controls and instrumentation
- Supply chain logistics
- Mine surface infrastructure design
- Geotechnical services

- Structural engineering
- Civil engineering for bulk earthworks and services, roads and rail and ports
- Bulk material handling and transportation from pit to port

Expertise

Amaspace has developed specialized skills over the years in multiple industry sectors as a result of the experience gained from working closely with a very large number of clients.

Building services:

Our team designs engineering systems that bring buildings and structures to life so they function efficiently, economically, safely and sustainably. Our aim is to design and deliver safe, comfortable and environmentally friendly buildings for both our clients and the end users.

MEP

Mechanical, Electrical and Plumbing services (MEP) are our team within the team, delivering a combination of specialist services, creativity and the most current technological advances. Our focus is on providing the optimum solutions and best value outcomes.

Heating, Ventilation & Air Conditioning

Our team of professionals have vast experience in the design, procurement, installation, trouble-shooting and maintenance of HVAC systems and Controls for Commercial and Residential buildings. You can count on us for comprehensive HVAC solutions including;

- Packaged Rooftop Air Conditioning systems
- Mini split and Multi split Air Conditioning systems
- Variable Refrigerant Flow Air Conditioning systems
- Commercial kitchen Hood and Make-up air systems
- Smoke extract systems
- General HVAC controls.

Lighting

We draw on the talents of our global collaborators to provide clients with access to expertise in all areas of the energy industry especially Smart LED lightning by providing clients with best outdoor lighting solutions for their facility at the highest quality possible.

Our service offering includes end-to-end lighting solutions, smart LED street light Infrastructure, and Lighting design solutions.

We provide street light infrastructure and management services with clearly defined service level expectations which includes Retrofitting and upgrading of existing street lights infrastructure, Provision of alternative power to ensure all-night availability when there are power outages and Deployment of renewable power solutions where ideal

Access Control System

We provide a scalable access control for diverse requirements which is a robust and highly adaptable system. It efficiently manages access for settings ranging from single low-rise office with just few doors to a massive high-rise complex with tens of thousands of doors, gate, barriers and elevators at multiple sites.

We are a reliable service provider when it comes to security concerns, providing extra access control measure such as two-factor authentication, digital system (digital keys and mobile apps option), identity management, PKI authentication, cloud-based management, multi-location management, multi-location management.

Closed Circuit Video Systems

We provide CCTV solutions to meet varying use case objectives, including on-site recording CCTV systems as well as detector activated remotely monitored systems. We deliver integrated solutions tailored for different use cases (access control, safety monitoring, controlling theft, arson & Vandalism), contexts (day or night usage, internal or external spaces) and monitoring requirements (local or remote monitoring)

Extra Low Voltage Installations

Our extra Low voltage expertise includes Data and Voice communication solutions, access control solutions, fire detection & alarm systems, building management systems and uninterrupted power supply systems. Working with our team, you are assured of reliable & dependable systems, fully compliant with acceptable codes and standards

Medium to Low Voltage Systems

We offer high level of expertise, design, supply, installation and commissioning in safe and efficient power supply and distribution systems from the power grid to consumer's final utility outlet. Our clients have relied on us for medium to low voltage distribution systems (acquisition, installation and connection to MV power grid by provision of substations and transformers at 33 and 11 KV Voltage level), construction and installation of efficient and cost-effective power distribution systems, alternative power generation systems, power metering and billing.

Fire Protection

We design, procure, install, test, commission & maintain all types of fire alarm & smoke detection systems, Fire Detection and Early Warning Systems, VESDA (Very Early Smoke Detection Apparatus), Foam Extinguishing System, Pure Water Mist System, Eco Friendly Gas Based Fire Suppression Systems, CO2 gas & FM200 systems, Water Based Fire Protection System, Fire hose reel, hydrant & water sprinkler systems. portable fire extinguishing system.

Power generation

Amaspace delivers efficient and reliable power generation solutions to our clients.
Our technical advisory, asset management and engineering design skills are used to enhance existing assets and develop, design and commission new infrastructure.

Renewable energy

Our clients benefit from our experience in wind, solar, hydro and bioenergy technologies. Partnering with leading research institutions, we can apply innovative solutions to create value for our clients.

Water and wastewater treatment

Crystal Ball's team of water experts deliver tailored treatment solutions for all aspects of the water cycle, from municipal and industrial wastewater to desalination, recycled and potable water treatment, from planning to operation.

Water Conveyance

Our water conveyance services encompass all activities that allows water to move reliably and efficiently to solve our clients' distribution, collection and drainage needs. This includes water (distribution systems for drinking water and reclaimed water, tunnels, pumping and storage); wastewater (collection systems for sanitary and combined sewers, tunnels, pumping and storage); and storm water (urban water drainage, collection/treatment systems, tunnels, green/ sustainable infrastructure, pumping and storage).

Roads

Amaspace supports the planning, design and delivery of roads — from rural access to complex freeways, toll roads to system interchanges.

Asset Management

Optimizing the value of an asset portfolio is critical for our clients' performance, continuity and profitability. Our management and technical resources assist investors and business operators to optimize returns on new and existing assets.

Contract Solutions

We assist clients with complex issues like strategic procurement and contract advice, providing dispute avoidance or dispute resolution.

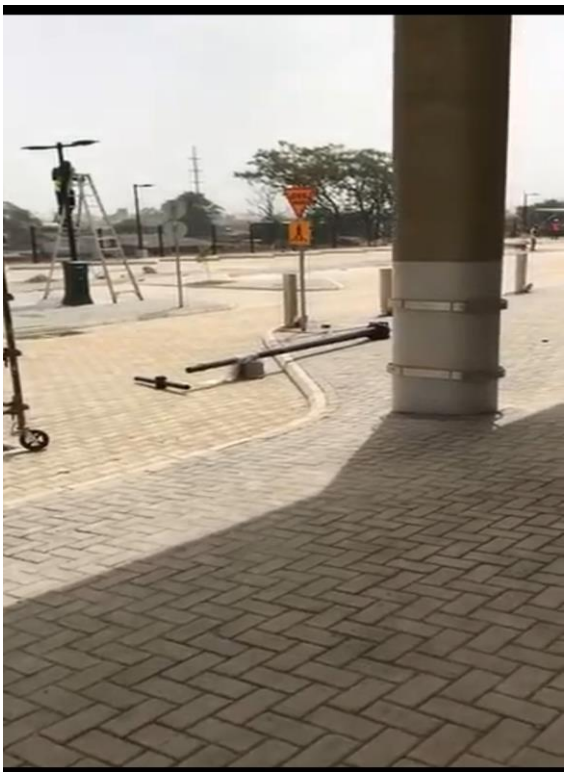
Program and project management

Our comprehensive capabilities in all project delivery models assure our private and public sector clients of project outcomes whether they are business, planning, transactional, delivery or operationally orientated.

PAST PROJECTS COMPLETED BY AMASPACE BUILDING SERVICING COMPANY,

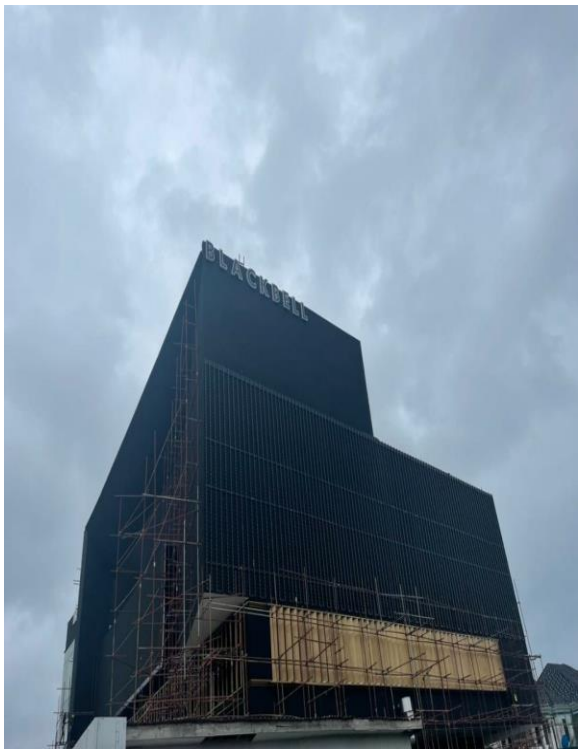
Supply and Installation of MEP Services for Cornerstone Towers Victoria Island Lagos

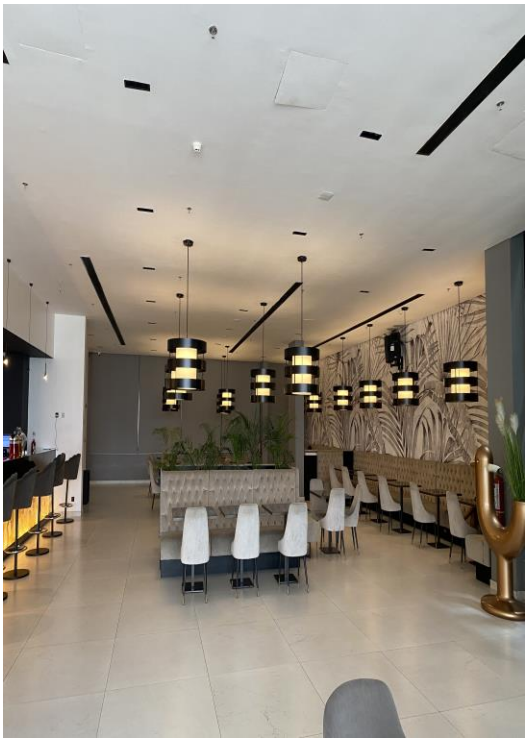
Supply and installation of Security System (Access control, Cctv surveillance and Biometric) for Everty-one Limited Victoria Island Lagos.



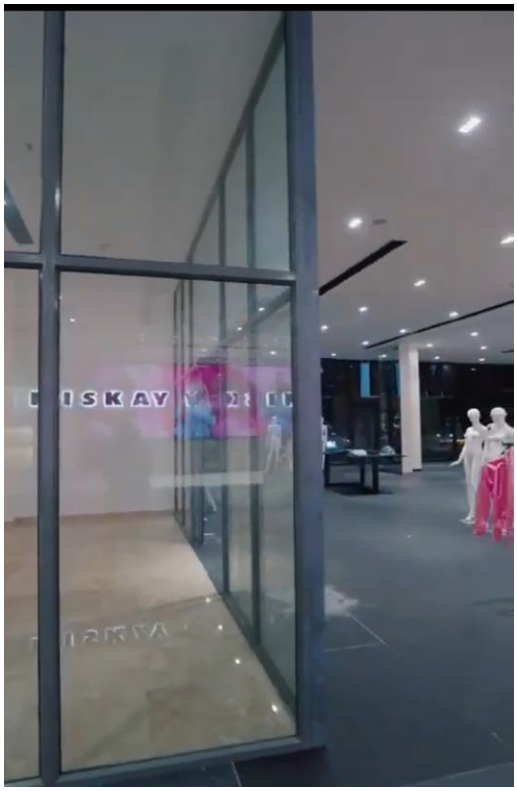
Installation of fire safety, security system and external lighting for Gate way mall Abuja

Supply and Installation of Aspiration Smoke Detector for Shoprite cold room warehouse

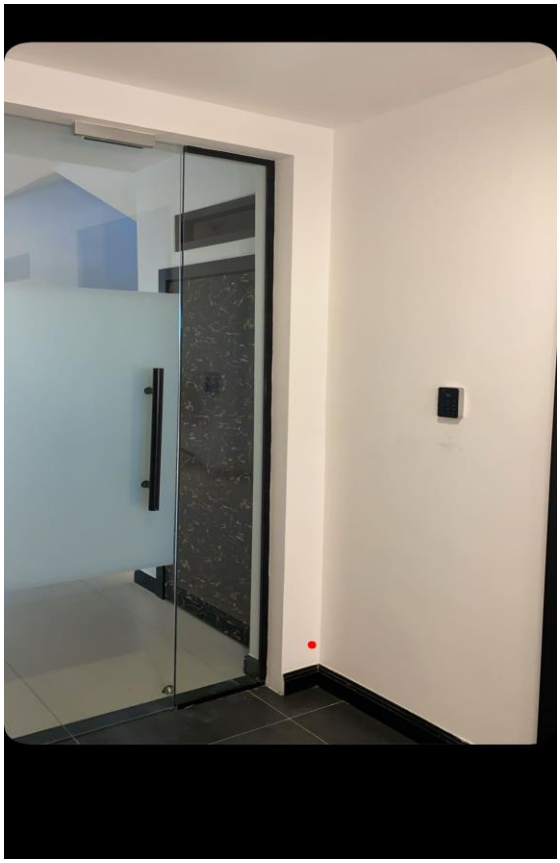


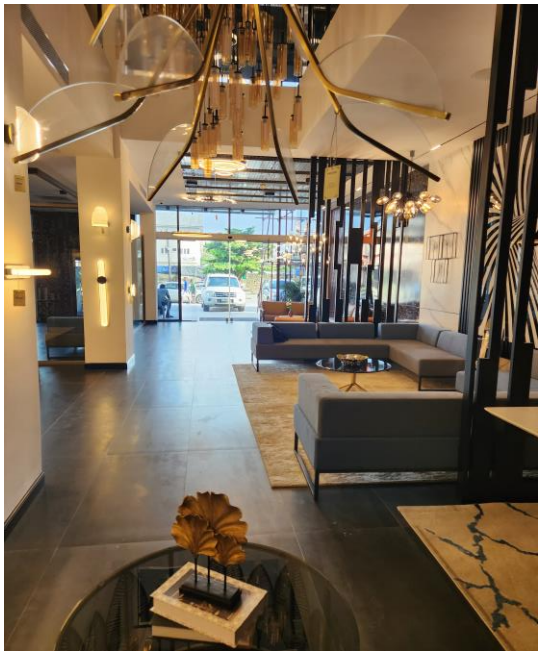


Supply and Installation of MEP Services for Black Bell Mall Ikota



Supply and Installation of MEP Services at Miskay Fashion Store Lekki





Supply and installation of MEP Services for Precise Lighting HQ Lagos

Installation of MEP Services for Blu Atlantic Hotel Lagos

A few of our Present Projects

Supply and Installation of Extra Low Voltage Services (Cctv Surveillance, Access control, Parking Barrier and Fire Safety system) for 120 Apartment Lekki

Supply and Installation of MEP services for Miskay Fashion House Ghana Accra.

Approach to Each Project

We adapt our solutions depending on the unique characteristics of each project and rely on our network of experts located throughout the world.

This resource is ready to ensure the seamless transition of the supply chain and to guarantee the best routing of goods taking into consideration time, cost and reliability.

In our projects, we consciously address the impact of our decisions on people and society. Amaspace has developed six sustainable design principles. These principles are applied to the greatest possible extent in our projects to ensure that our designs are climate-proof and nature-based, that we take the entire chain into consideration, and that we involve all stakeholders and end-users.

Our People

We are committed to unleashing the potential of our people through a high- performance culture that supports technical and personal development of our staffs and effectively aligns it with client needs.

We recognize that our success as a company lies in the experience and expertise of our people in their respective fields and our ability to attract top talents from all over the world in various fields. We achieve this by creating a vibrant and collaborative work environment and fostering a culture of empowerment to make them highly motivated and passionate about what they do, and imbibe in them a ken eye for customer satisfaction for our clients.

We thrive on diversity and uphold a culture of respect and mutual learning and support our highly skilled workforce with structured career development opportunities and trainings, development and mentoring to make them seasoned and up to date experts in their respective field.

Our people aim to set industry standards, benefit communities and make a significant contribution wherever we operate in.

Key Personnel

Engr. Abayomi Amao

C.E.O Amaspace

Mr. Abayomi is a graduate of Computer Science. He holds certifications in HSE, Fire Engineering and Building Management system. He has worked in different energy and electrical sectors with an experience spanning nine years. His accomplishment in the engineering industry includes the installations of engineering equipment in factories, shopping malls and high rise buildings. His skill set includes MEP and Fire Engineering and Building management system. His hobbies include solving problems, travelling and reading.

Engr. Adewale Adekola

Technical Director

Engr Adewale Adekola is a registered Electrical Engineer and Expert in Fire safety, Industrial Automation and Building management system. He earned a Bachelor's degree in Electrical Electronics Engineering from the Ladoke Akintola University of Technology, Ogbomoso, Nigeria.

His pursuit of excellence in his field is evident in his commitment to continuous learning, he has participated in numerous international training courses, expending his knowledge and skills in various facet of electrical engineering and project management.

Engr. Temitope Ademola Ige

Project Portfolio Manager

Engr. Temitope Ige (MNSE, R.Engr) is a graduate of mechanical Engineering. He holds certification in HSE, Fire Engineering and Building management system.

He is a COREN Certified Mechanical Engineer and also duly registered with the Nigerian Society of Engineers (NSE), He has worked in different energy and mechanical sector with an experience spanning eleven years as an Engineer.

He has held the position of a project manager and product manager in Precise construction company limited and has gone on to win awards such as Fire engineering and HVAC expert. His hobbies are playing cerebral puzzle games, travelling and reading.

Adeola Kulujo

Head, Finance and Accounts

Mrs Adeola is a seasoned banker with over 17 years of cognate experience. Her experience spans across several industries such as Consumer & Commercial Banking, Treasury & Funds Management, Investment Banking, Currency Trading, Product Development and Pension Fund Management.

Mrs Adeola is currently the Managing Director of Amaspace building service company and she is an alumnus of Lagos Business School. She holds a M.Sc in Economics & M. Sc in Corporate Governance
